## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-5 are allowed.
2. The following is an examiner's statement of reasons for allowance: The claimed tape drive as set forth in claim 1 that includes a memory in a tape cassette storing format state designation information including either an unformatted state and a formatted state and further an information acquiring means and an operation controlling means which operate in a manner as depicted in figure 15 to control the write and/or read operation on the recording medium based on the obtained format state information and on a result of a read operation is neither taught by nor an obvious variation of the art of record. The claimed recording and/or reproducing method as set forth in claim 4 that includes the steps of accessing a memory, acquiring format state designation information and controlling a write and/or read operation based on an obtained unformatted state information or formatted state information along with the result of the read operation of the tape is neither taught by nor an obvious variation of the art of record. The claimed recording tape cassette as set forth in claim 5 including a memory holding management information for write and/or read operations and format state designation information designating an unformatted state when the tape has yet to be formatted or a formatted state of the magnetic tape once formatted is neither taught by nor an obvious variation of the art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Drawings***

3. The drawings filed 12/31/03 are acceptable to the examiner.
4. Examiner obtained an English translation of applicants claimed priority document to verify support for the claimed invention in this document.

***Conclusion***

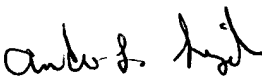

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Earhart teaches a disk cartridge including a memory storing directory and format information. Fujiwara et al. teaches a disk cartridge with a memory that can indicate if not formatted or wrong format however has a file date after applicants priority date of 1/7/03. Takayama ,having the same assignee as the present invention, teaches a cassette with memory that is used to determine the type of format of the cassette.
